Contents of Volume 25

No. 1

Research Articles

J.M. Fujitaki, L. Dee Nord, R.C. Willis and R.K. Robins (USA)
A novel non-radioactive method for detection of nucleoside analog phosphorylation by 5′-nucleotidase 1

S.L. Baader, G. Bruchelt, R. Handgretinger and D. Niethammer (Germany)
A simple assay for determination of iron release from ferritin in neuroblastoma cells 11

S. Cox and J. Harmenberg (Sweden)
Assay of intracellular thymidylate synthetase activity and inhibition by 5-fluoro-2′-deoxyuridine in lymphocytes 17

H. Ishida, T. Tsujinaka, Y. Kido, K. Kan, S. Iijima, T. Homma, M. Sakaue, C. Ebisui, T. Kurahori and T. Mori (Japan)
Establishment of a multi-dose study of chondroitin sulfate iron colloid for evaluation of the reticuloendothelial system function 25

M.K. Rajan, A. Balakrishnan and K. Jayaraman (India)
Development of an antibody against a 170-kDa fragment of fibroin isolated from cocoon fibres of *Bombyx mori* 37

V.N. Morozov, A.V. Gorelov and T.A. Zenchenko (Russia)
A new micromethod for mechano-chemical research 45

M.G. Gore, P.J. Greasley and C.I. Ragan (UK)
Bovine inositol monophosphatase: development of a continuous fluorescence assay of enzyme activity 55

S. Cherkaoui, P. Zell and P. Javet (Switzerland)
Characterization of Immobiline membranes for application in a multicompartment electrolyzer for protein purification 61

Short Note

I. Syrovy (Czechoslovakia)
Decreased Coomassie brilliant blue colour yield with glycated proteins 75

Announcements 79

Further Instructions to Authors 81

No. 2,3

Research Articles

M.D. Serra, C. Pederzolli and G. Menestrina (Italy)
A fluorimetric assay for the effects of cytolytic toxins on the transport properties of resealed erythrocyte ghosts 83

A. Shanubhogue, M.B. Rajarshi, A.P. Gore and V. Sitaramam (India)
Statistical testing of equality of two break-points in experimental data 95

R.I. Shrager (USA)
Analytic models for nonlinear curve-fitting of forward-rate binding data, with applications to hemoglobin 113

N. Belyaev, S. Paavilainen and T. Korpela (Finland)
Characterization of bacterial growth on solid medium with image analysis 125

M.M. Bersohn and R.N. Doshi (USA)
Measurement of sarcolemmal vesicle orientation by beta-adrenergic receptor binding 133

S.Q. Liu, Y. Ito and Y. Imanishi (Japan)
Cell growth on immobilized cell-growth factor; 4: interaction of fibroblast cells with insulin immobilized on poly(methyl methacrylate) membrane 139

S.E. Brolin and P. Naeser (Sweden)
Bioluminescence analysis of NAD(P)H and $NAD(P)^+$ preventing mutual interference by selective nucleotide destruction and enhanced specific light emission 149

A.S. Inglis, M.W. Duncan, P. Adams and A. Tseng (Australia)
Formation of proline thiohydantoin with ammonium thiocyanate: progress towards a viable C-terminal amino-acid-sequencing procedure 163

J.S. Nichols, H. LeVine III, G.F.H. Smith, D.M. Wypij and J.S. Wiseman (USA)
Determination of endothelin by an immobilized receptor assay utilizing a 96-well format 173

Short Note

C. Bignon, M. Roux and P.-M. Martin (France)
A simple vacuum transfer device for nucleic acids 185

Announcements 189

Further Instructions to Authors 191

No. 4

Research Articles

D.K. Lahiri, S. Bye, J.I. Nurnberger, Jr., M.E. Hodes and M. Crisp (USA)
A non-organic and non-enzymatic extraction method gives higher yields of genomic DNA from whole-blood samples than do nine other methods tested 193

B. Thompson Amann, P. Mulqueen and W. DeW. Horrocks, Jr. (USA)
A continuous spectrophotometric assay for the activation of plant NAD kinase by calmodulin, calcium(II), and europium(III) ions 207

G.I. Likhtenshtein, D.V. Khudjakov and V.R. Vogel (Russia)
Photochrome-labeling method in study of dynamics of biological systems 219

J.M. Bibby and D.W.L. Hukins (UK)
Measurement of pH to quantify urease activity 231

S. Ambrosio, J.R. De Oliveira and R. Bartrons (Spain)
HPLC analysis of hexosamine phosphates in biological samples 237

C.X. Nie, S.X. Zhao and Y. Lu (China)
Microdetermination of G6PD isoenzyme activity in human erythrocytes by thin-layer PAG-IEF 245

J. Plavec, L.H. Koole and J. Chattopadhyaya (Sweden)
Structural analysis of 2′,3′-dideoxyinosine, 2′,3′-dideoxyadenosine, 2′,3′-dideoxyguanosine and 2′,3′-dideoxycytidine by 500-MHz ^{1}H-NMR spectroscopy and ab-initio molecular orbital calculations 253

D. Haupt, C. Pettersson and D. Westerlund (Sweden)
Separation of (*R*)- and (*S*)-naproxen using micellar chromatography and an α_1-acid-glycoprotein column: application for chiral monitoring in human liver microsomes by coupled-column chromatography 273

M.L. Yarmush, X.-m. Lu and D.M. Yarmush (USA)
Coupling of antibody-binding fragments to solid-phase supports: site-directed binding of F(ab′)$_2$ fragments 285
